

Body Contouring & Fat Grafting

Infiltration

Variable Speed High Flow Infiltration Pump - with LED Fluid Volume Read-Out

Vitruvian Infiltration pump can be used in conjunction with Aquavage, Soft Touch irrigation tubing and Vibrasat for a complete closed and Power Assisted Fat grafting / body contouring procedure (as described by Del Vecchio & Wall)

- Reverse switch for flow direction preference
- Flow rate adjustable from; 0ml - 25ml - 475ml per minute
- Display: flow rate and volume dispensed
- Advanced technology allows for fluid volume measurements
- Backflow feature minimises fluid leakage
- Pneumatic foot switch activated
- Option to change from "momentary" or "maintained" foot control

Order Ref; B89055

B89213 - Soft touch tubing - for use with the B89055 pump

Tumescent Infiltration Tubing

High flow Irrigation pump tubing suitable for rotary motor irrigation.

Order Ref;

TP01 - for narrow (European) gauge irrigation pumps.

(Single spike, box of 10).

B89213 - Soft Touch Tubing - for infiltration of fluids and fat in closed system

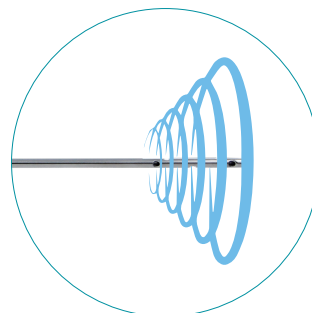

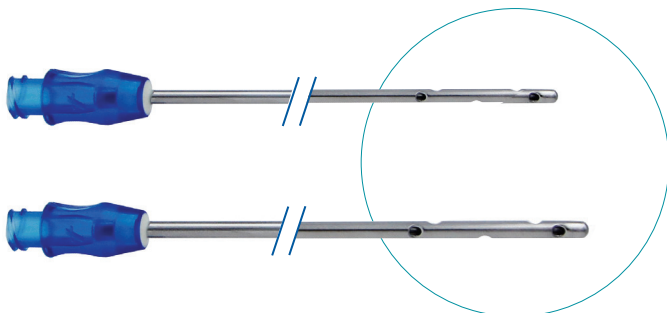

B89216 - 15' Large bore tubing with silicone insert for infiltration pumps

(box of 10)

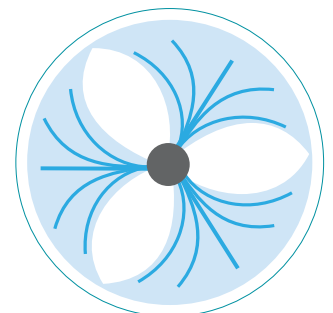

Infiltration Cannula

Multi-spiraled cannulas for tumescent fluid infiltration dissection prior to fat harvesting

Aspiration

Medela - Dominant Flex Suction Pump

One-touch adaptable flow rates allow for a wider variety of procedures to be carried out with just one pump. Designed for use in hospitals, clinics and medical practices, the Dominant Flex is the optimal medical suction pump for all suctioning needs. Fitted with 2 x 2,5 litre bottles and a changeover valve. Optional on/off foot switch is available.

Order Ref;

071.003T Dominant Flex Suction Pump

077.0571 Bacteria filter

077.0563 The Medela changeover valve with vacuum tubing

077.0085 2.5l Suction jar for single use liners

077.0913 Silicone tubing with connector

077.0521 Clamp holder

Medela - Vario 18 Suction Pump

A multipurpose medical suction pump for hospitals and clinics that is extremely quiet, offers reliability, and is lightweight, portable and robust.

High vacuum up to -75 kPa / - 563 mmHG

Flow of 181 / min

Weight: 4.2 kg

Order Ref; VARIO 18 CD

Medela Disposable Suction Liners

For use with ALL versions of Medela Aspiration pumps, such as Vario, and Dominant flex.

Order Ref;

077.0083 1.5 litre suction liner (box of 40)

077.0084 1.5 litre suction liner with solidifier (box of 30)

077.0086 2.5 litre suction liner (box of 20)

077.0087 2.5 litre suction liner with solidifier (box of 15)

Suction Tubing

Easy to fit with two flexible connectors that will accommodate all types of push-fit cannulae and connections. Available in clear high strength plastic that prevents collapsing even at high aspiration pressure. Packaged 10 per box.

Order Ref;

H91390E - 10 - 200cm tubing -10mm (external) 6.2mm (internal) with 11.2mm connector (internal)

H91400E - 10 - 300cm tubing -10mm (external) 6.2mm (internal) with 11.2mm connector (internal)

HPF 1780 - 400cm reinforced corrugated tubing - 9mm (external) 5.7mm (internal) with 10mm connector (internal)

Liposuction Cannula

MicroAire Compatible Reusable Cannulae

Black & Black Surgical has developed a superior, reusable cannula, fabricated from the highest quality materials, using tight tolerances to minimise vibration.

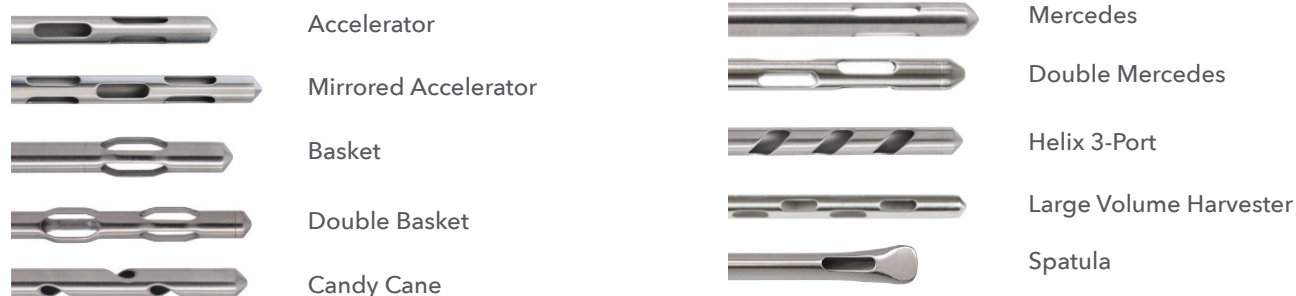

Now available in a full line of sizes and patterns to meet all your liposuction needs.

Reverse switch for flow direction preference

- High quality materials and craftsmanship
- Made in the USA: U.S. Patent D950,045 / D950,046
- Cannula tubing connector designed for non-slip fit, for both aspiration and infiltration tubing
- Reusable / Autoclavable
- Validated cleaning and sterilization instructions

Single Use Fat Harvesting Cannula

Cannulas specifically designed to perform an accurate fat SIZING during harvesting thanks to our patented diamond-shaped ports with 360° cutting edges.

- MEGAFAT
- Small volume
- LL syringe
- Suction 360°

- MACROFAT
- Med/Large volume
- LL syringe / Pump
- Suction precision

Metallic Luer/Lock

A range of cannula specifically designed to perform accurate fat SIZING during harvesting due to the diamond shaped cutting ports with 360° cutting edges, when selecting the appropriate negative pressure to harvest.

Centrifuge for Fat Grafting

CES-10 variable speed, time adjustable medical centrifuge for use with fat harvesting preparation and Platelet Rich Plasma. Can be used in the doctors office or in the operating theatre. The new CES-10 comes with a locking lid and 8 metal syringe holders / tubes - that are designed to hold 8 x 10ml BD luer lock syringes - with plunger REMOVED. The 8 metal syringe tubes/holders are autoclavable.

Mains powered and fitted with noise and vibration reducing pads.
